

Nolf Ridge ALMANA

New Culvert

■ he water was raging through the culvert where Cranberry Road crosses Sawmill Creek at the Stream Study class site. The whitewater was so enticing that a few of the seasonal naturalists couldn't resist body surfing through the culvert. In the process a newly acquired wedding band slipped unnoticed from a finger.

Two months later, students in mud boots are wading in the shallow water probing with nets in the now benign creek. They are searching for aquatic organisms as one aspect of their investigation to determine stream health. While walking through the relatively dry culvert a student picked a golden band from between the corrugations of the culvert bottom.

"It's over the culvert top and rising," came the report. Sawmill Creek eventually crested out about 2 feet over the culvert and below the road surface. All vehicles had been safely moved from the ridge top to the gravel pit/bus parking area. It wouldn't have been a surprise if the creek had washed out the road cutting off access to the main Wolf Ridge campus. These three snapshots of the Sawmill Creek area along with observations by Al Anderson, Finland Fisheries Supervisor resulted in the replacement and habitat restoration of Cranberry Road culvert at Sawmill Creek.

This August, the Sawmill Creek Fish Passageway Project, as the culvert replacement was officially called, took place. Two steel culverts where replaced with one large concrete box culvert. The new box culvert was placed lower than the stream bottom then covered with native substrate. The continuous natural gravel/rock bottom allows for free upstream movement of fish and other organisms in all water levels and opens up 3.14 miles of stream and 372 acres of wetland. Since Sawmill Creek is a designated trout stream this is extremely important for allowing access to spawning grounds and deep water wintering pools. The old steel culvert contributed to a certain amount of erosion of the creek banks. The new culvert is larger and will not become a "velocity barrier" during heavy rain flows thus reducing erosion and stream sedimentation, which is detrimental to fish spawning.

An amazing amount of individuals and agencies worked together to make the Sawmill Creek Fish Passageway Project a success. "The culvert replacement on Sawmill Creek is a perfect example of

A View From The Ridge

by Peter Smerud, Executive Director

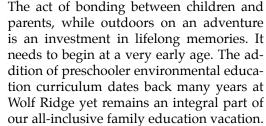

While it may take a whole village to raise The act of bonding between children and a child, at Wolf Ridge we are raising an environmentally informed citizenry – and that takes including more than just the middle school children that hundreds of school teachers work so hard to bring to Wolf Ridge each year. We continue to develop and enhance our Wolf Ridge yet remains an integral part of programs for all ages but several efforts, some our all-inclusive family education vacation.

new, are serving the often under-served audiences in the field of environmental education, high schoolers, preschoolers, grandparents, educators and other adults.

High school students are one of the most underserved populations in the field of environmental education. In 2008, Wolf Ridge offered our first four-week summer science credit camp which met great success and has continued to the present. With financial support from donors

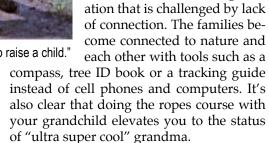

"It takes a village to raise a child." we soon thereafter brought the program to two Minneapolis high schools. A similar program was initiated this summer with Murray Junior High in St. Paul. An article on page 8 of this *Almanac* highlights the program. In these schools, Wolf Ridge is now teaching through environmental inquiry and immersion. Thank you to the Lloyd K Johnson, Medtronic, Leuthold Family, Prospect Creek, Boston Scientific and Cliffs Foundations, the US Forest Service, the MN Office of High Education and Get Ready for joining us this past summer to create life changing experiences for dozens of students who earned a year of high school science credit at Wolf Ridge.

Many young people grow their outdoor ethic in the shadow of a parent or grandparent. several organizations, as part of the Science

These family experiences not only educate but they inspire a child with a role model to fol-

For the grandparents that attend our Grandparent Grandchild Grand Adventure, in partnership with the Road Scholar organization, the value is often quite clear: a generation inexplicably linked to the outdoors is striving to pass an environmental ethic to a gener-

While Wolf Ridge has been educating the educators for decades in our naturalist training program, we have begun to reach farther to bring environmental education skills and knowledge to formal classrooms and other educational settings. An on-going series for advancing the knowledge and skills for educators - Increasing Great Lakes Literacy Among Educators was rolled out last year at Wolf Ridge. The coming school year will continue this series, in partnership with *Institute for Educators.* These opportunities provide training for local educators, from both formal and non-formal education settings, to learn from area researchers and scientists. This effort occurs because of the financial support of the MN DNR Lake Superior Coastal Program and in-kind contributions from the partner organizations.

I am continually proud when the work we do grows into brand new partnerships, in this case for adults. A Leave No Trace (LNT) Master Educator Course was conducted in partnership with the National Outdoor Leadership School (NOLS) and the Leave No Trace Center for Outdoor Ethics. Participants learn how to minimize their impact while camping, paddling

or hiking. And, finally our staff this summer worked with the Institute of Bird Populations to conduct three sessions of an Advanced Bird Banding workshop. Read more about these courses on page 9.

Wolf Ridge is more important than ever because, no matter the age, the experience helps rekindle our relationship with the natural world. The learning experiences here help build an environmentally literate citizenry across the entire spectrum of the "village," sharing the passion and information needed to translate fundamental environmental principles into environmentally responsible decisions made in our homes and communities.◆

Wolf Ridge

how public/private partnerships really work Students that come to Wolf Ridge and participate in Stream Study and Fisheries Management classes will continue to monitor the many different species of creatures that call Sawmill Creek home. The new concrete box culvert will also serve as an educational site not only for the 1800 students that annually take Stream Study but also as a model for the hundreds of trout stream road crossings needing to be replaced throughout Lake County and Minnesota. An interpretive sign will help document the value of the improvements.

> To the betterment of the environment, no longer will Sawmill Creek culvert be body surfing central at Wolf Ridge. It will, however, continue to be a place where students can participate in citizen science and learn about our effects upon the land.◆

he 2014 Wolf Ridge calendar features the North Shore photography of Paul Sundberg. He has been taking photos since the early 1970's. He purchased his first 35 mm SLR camera while serving in the military at Fort Bliss, Texas. For 28 years Paul worked as the manager of Gooseberry Falls State Park before retiring in 2010. Paul and his wife currently reside outside of Grand Marais where Paul continues his passion for photographing Lake Superior and The Boundary Waters Canoe Area Wilderness. You can see more of Paul's work on his website, PaulSundbergPhotography.com. Calendars are available for \$14.00 for donor members and \$18.95 for non-donor members, including shipping. They are also available at special prices, in lots of 25 for school fund raising and retail resale. Proceeds of all calendar sales directly support children attending Wolf Ridge school programs. Call Wolf Ridge at (218) 353-7414 for more information and to order. ◆

Introducing Shannon Walz

Shannon Walz is the new Education Director at Wolf Ridge. She is "excited and honored to be part of this wonderful organization and community again. I am looking forward to working with the Wolf Ridge team to continue to grow our organization and provide meaningful learning opportunities for our participants."

What is your connection to Wolf Ridge ELC? I spent two wonderful years at Wolf Ridge from 2003-2005 as a 1st and 2nd year naturalist. The two years that I spent here taught me so much about teaching and learning – especially in an outdoor classroom – that it has become my passion and I have been working in residential environmental education ever since. I spent 3 years working for the Oregon Museum of Science and Industry (OMSI) as a coordinator for the Marine Science Outdoor School. I got to explore all up and down the West Coast from

Monterey Bay and the Redwoods to the San Juan Islands in Washington. I then spent 5 years working for NatureBridge in Olympic National Park in Washington. NatureBridge is a nonprofit partner of the National Park service that provides schools and families with residential field science experiences. It was always a life goal of mine to work in a National Park!

Share with our readers something that you have learned from working at Wolf Ridge. I learned that people need the opportunity to learn and play outside. Seeing the sparkle in a kid's eye when a chickadee lands on her head and the glow of accomplishment in the group that has just completed their first overnight in the Boundary Waters is invaluable. I don't think I quite understood how lucky I was as a kid to be able to be outside as much as I was until I came to Wolf Ridge. It was here that I learned that I wanted to help as many people as possible have an opportunity to connect with the natural world like I did.

Tell us about yourself. In moving here, I just drove a U-Haul with a 26-foot sailboat attached across the country over two big mountain ranges! I feel quite proud that we made it in one piece without any major (or minor) incidents. I am married to a lovely man, Randall, who is originally from Kansas. He has done a lot of traveling and even lived in Fiji for 2.5 years in the Peace Corps. Most recently he has been working for a marine life center in Port Angeles, Washington. While he has visited Minnesota, he has never lived here and I am excited to share the North Shore with him in all seasons. We have two big, happy dogs — Sitka, a shepherd/chow mix and Skana, a newfoundland/lab mix. In my free time I like to be on or near water. You might find me hiking or on our sailboat. I also love to read and share meals with friends and family. Most recently I have delved into cheese making which is so much fun and very satisfying when you take your first bite and think — I made this!

What book you would recommend others read. Switch by Chip and Dan Heath. It is a great book on change.

Can you give us a travel tip? You have to go to Elwha River in Olympic National Park! You can drive to see it or hike/backpack up this magnificent river valley. The Elwha is making history as two large dams (100 feet and 210 feet) are being removed and the river is being restored to flow freely once again after 100 years. The Elwha used to have the largest salmon runs on the Olympic Peninsula until the dams were built and it had huge ecological and cultural significance. Soon the salmon will be able to return all of the way up river! It is a proud moment in our history that is worth experiencing.

Oregon coast

If you could visit with any conservationist/naturalist/environmentalist, living or dead, who would it be and what would you say. I went to Guyana for graduate school two summers ago and met an Amerindian woman who grew up and still lives on the edge of the tropical rainforest and the grass savannah. She has such an interesting worldview and knows so much about her local ecosystem and community's culture. I would love to go back and spend a few weeks just getting to know her and learning all that she knows about the plants in the area and their uses as well as try to understand the unique relationship that she has with the place that she lives.

What is your favorite place at Wolf Ridge and why? Wolf Lake. I love being out in a canoe on the water. You never know what you might see and it is always so peaceful. ◆

Jo Swanson (09) completely through-hiked the Great Eastern Trail. Katie Fritz (09) and David Butcher (10) were recently married and Katie is now teaching high school English in Silver Bay, MN. Emily Carlson (10) is a newly certified Vet Tech working in the Twin Cities area. Emily Brian (10) recently joined the staff at the Great Lakes Aquarium in Duluth. Chris Johnston (SU11) just landed a full time science teaching job in Scotland. MJ Bach (12) is an EE Fellow at St. John's Arboretum. Anne Gottwald (12) backpacked Yosemite Valley as a trail crew leader for SCA and is now at Ferry Beach Ecology School in Maine. Danny Pirtle (12) is a research intern at Golden Gate Raptor Observatory, CA. Andrea Wakely (12) was a naturalist at Gooseberry Falls State Park and is continuing with her master's at UMD. Class of 2013: Becca Bell spent the summer sailing and with family in Willmar. This fall she is pursuing her master's degree in EE at UMD. Robyn Char was at WR this summer and now can be found at Camp MacDowell in Birmingham, AL. Sarah Engstrom fit in working at both Concordia Language Village and an organic farm on Bainbridge Island, WA. Mary Beth Factor instructed at WR and continues on here this year as a mentor naturalist. Nikki Field worked as a naturalist at WR and with the Road Scholar program and now is the new Life Enrichment Coordinator for Carefree Living in

St. Cloud, MN. Jana Graczyk was the summer day camp coordinator in the Twin Cities and is now an outdoor instructor at Camp Widgiwagan. Brent Hennen will also be at Widjiwagan. He spent the summer instructing at WR with focus on the new fishing and archery programs. Dan Hnilicka worked at the Raptor Center this summer and returns to WR for a second year. Jill Legault paddled away the summer as a canoe tech and portage crew for Quetico Provincial Park. Max Melby worked for Eden Prairie Parks and Rec and is back at WR for another season. Also returning for a 2nd year is Tessa Olson. She was a naturalist at the Center for Alaskan Coastal Studies in Homer this summer. Tom Pearce was a trail crew leader for SCA in Yosemite Valley and is at Ferry Beach Ecology School in Maine now. Jenna Pollard heaved rocks around as an apprentice stonemason with Will Steger and at St Ben's volunteering. Sara Sloan was WR's naturalist at Blue Fin and is pursuing a future internship at Peoria Zoo. Frances Van Sloan was in Africa leading a STEM camp for African girls and will be returning there as the new Operations Director for the WAAW Foundation (Working to advance STEM education for African Women in Nigeria). Rachel Zacher was the summer camp director for counselors at WR and now is an outdoor instructor at Keystone Science School, CO.

 $\mathbf{6}$

Wolf Ridge

What some deem as "the South", Mary Beth calls Missouri her home base. She graduated with a degree in Elementary Education and is currently pursuing a masters in Environmental **Education through Wolf** Ridge and UMD, always allowing time to get lost in the woods.

"2013 - Best Summer Ever"

by Mary Beth Factor, Wolf Ridge Naturalist

Love to fish? Check. Love archery and Ridge with smiles and stories of adventures. hunting? Check. Interested in gaining academic credits while NOT in a classroom? Check. This past summer all these opportunities could be fulfilled at Wolf Ridge.

Summer camp at Wolf Ridge is gaining more popularity and the interest for diverse types of camp programs is increasing. Wolf Ridge heard the call and three new camps made their debut this summer - Camp Fish, Angling to Archery, and an academic camp for the students of Murray Jr. High of St. Paul, MN called Ecology Inquiry Immersion (EII).

With nine boys in attendance for the first Camp Fish during mid-July, and seven girls from the Boys and Girls Club of St. Paul, MN a week later, the debut was successful. Focusing on the techniques of fishing, testing the quality of lakes and streams, and a hands on experience with the different species that roam not only Wolf Ridge's water ways, but Superior National Forest as well, this camp was jammed packed with a plethora of experiences to take home. Midweek, the campers were exposed to a two-night camping trip on Lake 29 of Superior National Forest, where they not only put their skills to the test, but learned to filet their catch as well. One quote from a parent states, "My son feels more confident and knowledgeable about his techniques for catching, cleaning and cooking fish."

Angling to Archery also caused quite a stir this summer. Comprising of nine campers total, both male and female, this camp focused on the techniques of fishing and aquatic sciences, and additionally exposed campers to responsible hunting ethics. Campers practiced their archery skills and also had a two-night camping/fishing trip. The campers left Wolf

Ready, aim,...

Fileting the catch.

Wolf Ridge staff Pete Gravett and Brent Hennen were the creative energy behind Camp Fish and Angling to Archery. Monies from the Donald Weesner Foundation helped obtain necessary supplies to get programs under wav.

In September 2012, twenty-two eighth graders of Murray Jr. High chose to take the Environmental Inquiry and Immersion Class with Tim Chase, a science teacher at Murray Jr. High. Tim would cover earth science, biology, and chemistry during the school year. Kim Swanson, Wolf Ridge's Summer Academic Coordinator would then tie it all together during a 2-week field experience in the summer. When students completed the "Wolf Ridge Elective" they can jump from the basic to advanced science track at their school.

Murray Jr. High's stay at Wolf Ridge was the climax of that year-long elective. The students focused on forestry management as a basis for their research projects. Teachers at Wolf Ridge exposed them to topics varying from small mammals to bird research to forest ecology, providing them with inspiration to create a capstone project. The night before departing, students presented their projects to a forum of people, stating their methods, data, and conclusions. It was quite a feat for many of them! All in all, the students took away more than they expected. A student commented, "Coming to Wolf Ridge is a great program...the thing you would get out of it would be credits for high school, courage, friends, knowledge, and many dreams you want to achieve and make happen."

Between all of the camps and programs offered at Wolf Ridge, countless campers and students walked away with memories to savor. As one student states, "2013 - Best summer ever!"◆

Summer. Right on target!

Leave No Trace

by David Butcher, Wolf Ridge Naturalist

Levery day, more and more people are getting all had a unifying passion for taking care of out and enjoying natural places, from state natural places and protecting them for future parks and waterways to national monuments and parks. The National Park Service reported just fewer than 283 million visits last year. The course lasted for five days and focused Visitation in the Superior National Forest near on the specifics of teaching the seven Wolf Ridge continues to hover in the hundreds of thousands annually. As use of natural areas increases, so does the need for education on on durable surfaces, minimizing campfire land preservation and outdoor ethics. Since its inception, Wolf Ridge taught about the value and importance of outdoor spaces. This August Wolf Ridge continued that mission on an aspect of each principle. The week also by collaborating with the National Outdoor included multiple hikes in the surrounding Leadership School (NOLS) and the Leave No Trace Center for Outdoor Ethics (LNT) to host a evaluating human impacts at campsites, and Leave No Trace Master Educator Course.

The Master Educator course is the highest level of LNT training offered and when Overall the course was a great success NOLS representatives approached Wolf Ridge about hosting a course we jumped at the opportunity. The course attracted people from well as the qualification to teach advanced different backgrounds and places. Some of the LNT workshops. Wolf Ridge is dedicated to participants' backgrounds included Boy Scout troop leaders and administrators, an outdoor its own LNT Master Educator, and is excited recreation professor from North Hennepin about the collaboration with NOLS and LNT Community College, and a few alums of for this coming summer when the next master past NOLS courses. Though the participants' backgrounds were unique from each other, they

generations.

principles of Leave No Trace outdoor ethics. Some examples being traveling and camping impacts, respecting wildlife, and disposing of human waste properly. All the master educator candidates got the chance to teach area, observing trail building techniques, even breaking down a couple of makeshift campfire rings along the way.

and course participants came away with a greater knowledge of outdoor ethics as continuing with its LNT practices, now has educator course returns to Wolf Ridge!◆

Wolf Ridge

Advanced Bird Class

by Lori Walewski, Wolf Ridge Naturalist

his summer Wolf Ridge hosted three Positive comments about the class abounded. sessions of the Advanced Bird Banding Class "I gained so much from offered by the Institute for Bird Populations the course and expect as I (IBP). The four-day class is designed for continue to band and exercise experienced bird banders wishing to improve what I have learned more their banding knowledge. Mornings were spent pieces of the puzzle will hands-on with live birds refining sexing and make sense." "The course aging skills, advancing comprehension of molt was excellent. Worked a lot strategies, and understanding and identifying on molts and the progression the differences between specific adult age from hatching to ASY. That's classes while using the Identification Guide to what I needed." "I feel more North American Birds by Peter Pyle. Afternoon competent in my banding lectures covered details of feather morphology, knowledge." "Would enroll plumages and molt limits as well as the roll of again in a heartbeat, just to banding in research and monitoring. The classes reinforce valuable lessons." were tailored to the skill level of participants.

All three sessions of the class filled to capacity. offered at Wolf Ridge.◆

Wolf Ridge FUNdraising Event

December 6, 2013 6:00-9:00 pm

at the Great Lakes Aquarium, Duluth, MN Tickets are \$35 in advance (\$45 at the door)

Join us in this tasty event to raise money for the Wolf Ridge School Scholarship Fund and the general operation of Wolf Ridge. Last year's event raised over \$42,000 and was a key source of the more than \$38,000 we gave away in school scholarship support.

The hors d'oeuvres will be provided by Splashing Rock Restaurant. Fitger's Brewhouse, Carmody's Irish Brewpub and the Canal Park Brewing Company will supply us with a bevy of brews to sample. Once again expect some great live jazz. The raffle boxes are back along with the silent and live auctions, which featured all kinds of great getaways and outdoor gear.

Tickets are available online at www.wolf-ridge.org or by calling the Wolf Ridge office.

Shop on-line at the Wolf Ridge store: www.wolf-ridge.org

Wolf Ridge offered Fish Camp for the first time this summmer. It was clearly a success.

Wolf Ridge is an accredited residential environmental school for persons of all ages. We offer immersion programs which involve direct observation and participation in outdoor experiences. Wolf Ridge programs focus on environmental sciences, human culture and history, personal growth, teambuilding and outdoor recreation.

Our mission is to develop a citizenry that has the knowledge, skills, motivation and commitment to act together for a quality environment.

• Modeling values, behaviors and technologies, which lead to a sustainable lifestyle.

We meet our mission by:

- Fostering awareness, curiosity and sensitivity to the natural world.
- Providing lifelong learning experiences in nature.
- Developing social understanding, respect and cooperation.
- Promoting the concepts of conservation and stewardship.
