

MARGARET A. CARGILL LODGE

Margaret A. Cargill (MAC) Lodge officially opened on May 5, 2018. The outside structure is mostly the same as the building's previous rendition, the West Dorm, with extensions to the central entryway, main lobby, and a new deck. The biggest improvements are the new dorm room configurations, which now have a bathroom and shower in each room, five group gathering areas, and the sustainable design of the building. MAC Lodge residents will be able to participate in energy and water use monitoring, and to learn how their daily choices impact resource use.
